VALVESTAR® Web

LESER finished the VALVESTAR® Web Version and presents it in a new look.

The screenshot shows the top navigation bar with the LESER logo and 'The Safety Valve.com'. Below the navigation bar, there are two main sections: 'About LESER VALVESTAR®' and 'Agreement'. The 'About' section describes the software's capabilities and provides a link to www.leser.com. The 'Agreement' section contains a disclaimer and a checkbox labeled 'Agree'. Below these sections is the 'Authentication' area, which includes a login form with fields for 'Login:' and 'Password:', and two buttons: 'Log on' and 'New user registration'.

How to Login?

For your first login use the button "New user registration" and fill in your personal login with password.

Why user authentication?

LESER provides free disk space at the VALVESTAR-Server for authenticated user

- to save projects
- to save personally settings

LESER guarantees safe handling of data and do not give data to third party.

Benefits of VALVESTAR®Web

- Same sizing standards as CD-ROM Version VALVESTAR® 7.1.3. You can calculate in Web and copy the xvsp-file onto your personal computer and make further calculation with local installed VALVESTAR® CD-ROM Version.
- Similar workflow to CD-ROM Version VALVESTAR® 7.1.3 makes it easy to size with VALVESTAR®Web
- Group work worldwide is possible to size online a complete project, you only have to use the same login/password
- Global availability – no other sizing program for safety valves is worldwide easier to use than LESER VALVESTAR®.
- Big spread to all customers – LESER VALVESTAR® is transparent for all people
- LESER VALVESTAR® is for free, no costs for user, no user licence is necessary

This is real a quantum leap in sizing safety valves.
